

EZ DOCS enables you to combat fraud and comply with FTC Safeguards Rule requirements to protect customer PII (personal identifiable information). A web-based application built to the highest security and data privacy standards, EZ DOCS can be used in-store or remote to:

- Collect and store driver's licenses and other IDs
- Verify identification in real time
- Collect and store stipps and other deal-relevant documents

According to a recent study, 79% of car dealers lost a vehicle to fraud in the past year

Fair Oaks Chantilly Stopped a Thief

Within weeks of using EZ DOCS, one dealer used the driver's license verification feature before a test drive and caught a fake. The police confirmed the individual was a suspect in an auto theft at another local dealership.

EZ DOCS is easy to use and does not require special scanning equipment or the need to download an app, and it works with any device and browser. With EZ DOCS your dealership can:

- ✓ Prevent and deter theft through identity fraud
- ✓ Reduce PII risks and avoid regulatory fines
- ✓ Enhance the customer experience
- ✓ Reduce contracts in transit
- ✓ Lower insurance premiums and other costs

No More PII Risks Due to...

- Photocopies scattered around the dealership
- Requests to send IDs and documents via text or email
- Sensitive information being stored on a person's phone or computer

EZ DOCS Essentials is a FREE-TO-DEALER solution. **EZ DOCS Unlimited** is a dealer-paid upgrade that takes EZ DOCS to the next level, optimizing the car-buying process from initial customer contact to signing final deal documents and beyond. Our patented, state-of-the-art technology can be used to streamline operations, enhance security and improve the customer experience.
